Reference for Kelvin Yuan-Shuo Hsu

My name is Dr. Jason Chan and I am a lecturer at the School of Information Technologies at the University of Sydney, and I highly recommend Kelvin Yuan-Shuo Hsu due to his excellent academic performance record, his positive attitude and work ethic, and his friendliness in dealing with people.

Kelvin was personally selected by me to work as a tutor in ENGG1801 Engineering Computing in semester 1, 2013. From my regular interactions with him in weekly tutor meetings, it is obvious that Kelvin is a very motivated individual who enjoys the work that he is engaged in – not just tutoring, but also his academic studies and research projects that he has been involved with.

During the semester's mid-semester and end-of-semester UoS survey, students' comments about Kelvin were very positive. Many students cited that he was a very generous and patient, and that they felt comfortable due to his friendly nature. He would get them to think and guide them towards the solution without actually giving them the answers, thus showing his commitment to quality work.

When enrolled in ENGG1801 Engineering Computing in semester 1, 2012, Kelvin scored the equal-highest mark out of approximately 650 students. He was also enrolled in my lab, which allowed me to carefully inspect the way in which he conducted himself towards his work each week. He has a very positive attitude, a great enthusiasm and curiosity towards learning, and is very capable of independently solving problems through his own research and experimentation.

I have also had the pleasure of getting to know Kelvin on a more personal level, as we both share the same hunger of learning in a variety of fields, and I can say that he is a genuinely happy person with a positive character, even when dealing with tough situations, and that he is a caring person and has great integrity. He really thinks about how best to improve situations and help others as well as improving himself as an individual.

Yours sincerely,

Dr. Jason Chan
ENGG1801 Engineering Computing UoS Coordinator in 2012 and 2013
